Restriction/Election

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-33, drawn to multiplexing signals, classified in class 370,

subclass 537.

II. Claims 34-69, drawn to de-multiplexing signals, classified in class 370,

subclass 3542.

III. Claims 17-111, drawn to multiplexing combined with de-multiplexing,

classified in class 370, subclass 535.

2. Inventions I, II and III are related as combination and subcombination. Invention

in this relationships are distinct if it can be shown that (1) the combination as claimed

does not required the particulars of the subcombination as claimed for patentability, and

(2) that the subcombination has utility by itself or in other combination (MPEP §

806.05(c)). In the instant case, the combination as claimed does not require the

particular of subcombination as claimed because group I does not require the

particulars of group II or III for patentability and that group I or II as the subcombination

has utility by itself.

3. Because these inventions are distinct of the reasons given above and have

acquired a separate status in the art shown by their different classification because of

their recognized divergent subject matter, and the search required for each Group I and

II is not required for other Group, restriction for examination purpose as indicated is proper.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brenda Pham whose telephone number is (571) 272-3135. The examiner can normally be reached on Monday-Friday from 9:00 to 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynn D. Feild, can be reached on (571) 272-2092.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (571) 272-2600.
